🍕 Pizza Sales Dashboard – Business Analysis Report

---

1. Executive Summary

This dashboard provides a comprehensive overview of pizza sales performance, customer behavior, and operational trends.
The analysis highlights **strong overall sales**, **clear peak demand periods**, and **distinct customer preferences** by size and category.
Key insights from this dashboard can directly support **inventory planning, staffing decisions, promotions, and menu optimization**.

---

2. Overall Business Performance

🔹 **Key Metrics Overview**

- **Total Sales:** ₹8,17,860.0
- **Total Orders:** 21,350
- **Average Orders per Day:** 60
- **Average Pizzas per Order:** 2

🔹 **Interpretation**

- The business shows **healthy sales volume** with consistent daily demand.

- An average of **2 pizzas per order** indicates strong upselling potential (combos & add-ons).
- Order volume suggests the store operates in a **stable, mature demand stage**, not a volatile growth phase.

---

3. Sales Trend Analysis (Monthly)

📈 **Sales by Month**

- Sales remain **relatively consistent across the year**.
- **Peak Month:** July
- **Lowest Sales:** September & October

🔹 **Business Insights**

- Mid-year peak may be driven by **seasonal demand, holidays, or promotions**.
- Slight dips toward year-end suggest an opportunity for:
    - Festive offers
    - Year-end discounts
    - Loyalty campaigns

🔹 **Recommendation**

👉 Introduce **targeted campaigns** during low-performing months to stabilize revenue.

---

4. Time-Based Demand Analysis

⏰ **Peak Hours (Orders by Time Slot)**

- **Highest Demand:**
  - 12 PM – 3 PM
  - 6 PM – 9 PM
- **Lowest Demand:**
  - 9 AM – 12 PM

🔹 **Interpretation**

- Strong **lunch and dinner peaks**, typical of food service businesses.
- Morning hours have minimal traction.

🔹 **Operational Recommendations**

- Increase **staffing and kitchen readiness** during peak slots.
- Run **happy hour / brunch deals** during low-demand morning hours to boost sales.

---

5. Customer Preference Analysis

🍕 **Preference by Pizza Size**

- **Large (L):** ~36% (Highest)
- **Medium (M):** ~32%
- **Small (S):** ~30%
- **XL & XXL:** Minimal share

🔹 **Insight**

- Customers strongly prefer **value-for-money larger sizes**.
- Extra-large sizes are niche and may not justify high inventory costs.

🔹 **Recommendation**

👉 Focus promotions on **Large & Medium combos** and reduce overstocking of XL/XXL sizes.

🍕 **Preference by Category**

- **Classic:** ~29% (Top Performer)
- **Supreme & Veggie:** ~24% each
- **Chicken:** ~23%

🔹 **Insight**

- Demand is **well-distributed**, indicating a **balanced menu**.
- No category is underperforming drastically.

🔹 **Recommendation**

👉 Maintain category balance, but spotlight **Classic pizzas** as hero products in marketing.

---

6. Weekly Sales Pattern

📅 **Peak Days**

- **Highest Orders:** Friday & Saturday
- **Lowest Orders:** Sunday

🔹 **Interpretation**

- Weekend demand aligns with **leisure dining behavior**.
- Slight drop on Sundays may indicate customer fatigue or lack of offers.

🔹 **Recommendation**

👉 Introduce **Sunday-only deals** or family combo offers to improve weekend closure sales.

---

7. Product-Level Performance

🔻 **Bottom 5 Pizzas (By Total Sales)**

- Several Veggie and Supreme pizzas appear repeatedly.
- Indicates **low customer preference or poor visibility**.

🔹 **Business Insight**

- These items may be:

    - Poorly marketed
    - Overpriced
    - Less aligned with customer taste

🔹 **Strategic Actions**

- Reposition these pizzas with:
    - New pricing
    - Combo offers
    - Recipe tweaks
- If performance remains weak, consider **menu rationalization**.

---

8. Key Business Takeaways

✓ Strong overall sales with predictable demand patterns
✓ Clear lunch and dinner peak hours
✓ Customers prefer **Large & Medium pizzas**
✓ Classic category dominates but menu is well balanced
✓ Opportunities exist in:

- Low-demand hours
- Underperforming products
- Seasonal promotions

---

9. Final Recommendations for Management

1. **Operational Optimization**
    - Staff more during 12–3 PM & 6–9 PM
    - Optimize inventory for Large & Medium sizes
2. **Marketing Strategy**
    - Promote Classic pizzas aggressively
    - Launch weekday and morning-time offers
3. **Menu Optimization**
    - Improve or replace bottom-performing pizzas
    - Focus on combo-based upselling
4. **Revenue Growth**
    - Leverage low months with targeted campaigns
    - Introduce loyalty & repeat-customer incentives
